ALL YOUR SECURITY NEEDS!
WWW.RINOSecurity.COM

Your Source for Professional Security Solutions

Rinosec was founded in 2008 as Part of PE's Vision and Security Group. This group has specialized in a wide range of high technology products such as camera, alarm and gate opener systems. The need for advanced optical and image processing technologies came from the company's activities in these areas. After years of successful development of advanced optics and digital processing technology, the Security Solutions division was created to provide commercial security products from these technologies. What you see in this catalog is not just another version of video security products produced from the shelf components. Rinosec's security solution products are based upon cutting edge technologies that are unique in the security industry. When you try our products you will experience the difference that these technologies provide.

Quality & Reliability

"Quality and Reliability" is of the upmost importance for physical security products and Rinosec understands this. Therefore we are committed to adhering to extremely high testing standards set throughout the product development stages.

Rinosec has a dedicated Quality Assurance team using cutting edge testing equipment to rigorously test and prove the reliability of the products. The Quality Assurance team publishes the reliability reports and MTBF figures (Mean Time Between Failures) to provide a guide for product lifetime expectations.

Image Quality Evaluation

To guarantee the image quality of our products, we conduct tests in a dedicated image quality evaluation lab. The resolutions / chrominance / phase under various light / environment conditions for various objects, colour reproducibility and other operational functions are tested, to ensure reliable image quality.

ALT (Accelerated Life Test) / HALT (Highly Accelerated Life Test) :

We ensure product reliability by eliminating potential quality defects in advance, through the use of a variety of high-level stress tests relating to temperature, vibration and power.

Temperature & Humidity Profile Test :

(Environmental tests for high-temperature/low-temperature/high-humidity) : We ensure that our products operate normally under any environmental conditions by conducting a variety of environmental tests.

Power Environment Test :

To secure the electronic reliability of our products, we perform an electro-static test, which verifies the electrical tolerances against unstable voltage supply, voltage drop and thunder stroke.

Distribution Environment Test :

To minimize the possibility of damage occurring during shipping, we perform tests including vibration, drop, and cold proof drop according to international standards, which simulate the types of situations that can occur during product distribution.

مشخصات فنی جک

جک های ۲۲۰ ولت دائم قفل
کورس کارکرد ۵۰ سانتی متر (مدل ۵۰۰)
کورس کارکرد ۴۰ سانتی متر (مدل ۴۰۰)
جابجایی درب لوایی با عرض ۴ متر ۴۰۰ کیلوگرم

مشخصات فنی برد

تنظیم دقیق زمان کارکرد موتور بصورت هوشمند
خودکار بسته شدن درب پس از عبور از چشم با قابلیت تنظیم زمان
قابلیت نمایش شماره ریموت و حذف ریموت خاص
برنامه ریزی مجزا برای درب دو لنگه، تک لنگه
توابع عملکردی کامل

ترانس جداگانه
هیت سینک کامل برد
قابلیت اسباب کشی

مشخصات فنی

امکان شنود مجرمانه محیط نصب سیستم دزدگیر اماکن رینوسک امکان ارسال فرمان به پنج تجهیز برقی از طریق پیامک و نرم افزار اندروید شارژ پولی سیمکارت داخلی از طریق نرم افزار اندروید و Keypad پشتیبانی از کلیه سیمکارت های موجود بازار ایران

قابلیت ضبط و ویرایش نام هر زون دزدگیر توسط کاربر

تغییر حالت NO و NC برای کلیه زون های سیمی مرکز کنترل دارای ۲۰ حافظه تلفن کننده سخنگو با قابلیت انتخاب حالت تماس یا SMS اعلام قطع و وصل برق بصورت کاملا سخنگو و هوشمند ذخیره سازی دستگاه بیسیم (چشم و دتکتور و مگنت بیسیم) برای هر زون مجزا

دارای ۹ زون با سیم و بی سیم

ارسال SMS دوره ای حاوی میزان شارژ سیمکارت داخلی بعد از تحریک دستگاه قابلیت تبدیل هر زون به زون دینگ دانگ، ۲۴ ساعته و تاخیری و فوری NO - NC

اعلام شماره زون تحریک شده توسط SMS فارسی

گزارش فعلی یا غیر فعلی بودن رله خروجی در قالب پیامک فارسی

امکان تغییر کاربری هر زون به مدل حریق یا سرقت

قابلیت معرفی ۱۵ عدد ریموت کنترل با ارائه کد امنیتی و شناسایی توسط دستگاه نمایش میزان آنتن دهی شبکه سیمکارت داخلی بر روی صفحه نمایشگر مرکز کنترل

عدم مسدود شدن سیم کارت در صورت ارسال رمز شارژ سیم کارت

وارد کردن و اضافه کردن و حذف کردن شماره تلفن از طریق برنامه اندروید

محیط برنامه کاربر پسند بدون نیاز به نصب و دانش فنی

حذف ریموت کنترل یکی از کاربران توسط مدیر از طریق نرم افزار اندروید

استعلام ولتاژ باطری توسط صفحه کلید روی مرکز کنترل

روشن و خاموش نمودن یک وسیله برقی توسط ریموت

استفاده از صدای شخصی به جای دینگ دانگ

قابلیت تنظیم صدای تک آژیر بلندگوی خارجی در ۴ حالت مختلف

نمایش وضعیت فیوز AUX روی پنل دستگاه

سرعت شماره گیری بالا (آغاز شماره گیری در کمتر از ۸ ثانیه)

تغییر تمام تنظیمات دستگاه از طریق نرم افزار اندروید و SMS

RINOSEC TOTAL SECURITY SOLUTIONS

NETWORK

Network Solution

iPiS, Your smart security solution

iPiS is a one-stop IP video surveillance solution from Rinosec that provides the best solutions of network systems; Network cameras, Encoders, NVRs, Monitoring software, Mobile monitoring solutions, Hardware NVRs, and Software NVRs (Recording Software). Based on cutting-edge technology earned from a long history in the video surveillance industry, iPiS supports users with outstanding functions that is convenient & easy to manage.

Network Cameras

Network cameras communicate with monitoring/recording tools via an IP network. Rinosec is expanding its line-up of network cameras, based on its excellent technological background, these network cameras, are equipped useful functions.

Network Video Encoders

To adapt an analogue surveillance system into a network surveillance system does not mean that the pre-installed analogue cameras have to change. Encoders convert the analogue video signal into network one so that the video from analogue cameras can be transmitted over an IP network.

Monitoring Software

A standard PC can be used as a monitoring device by installing NET-i, Rinosec network monitoring software. Familiar operation and an easy-to-use GUI benefit users.

Hardware NVRs

Unlike DVRs that digitize the analogue video feeds, NVR receives video images digitized from IP network. While the DVR has to be located near the analogue feeds, the NVR can be located anywhere on a network and users can simply access the recorded video again from anywhere on the network.

Software NVRs (Recording Software)

NET-i Ware, Rinosec's network-recording software, provides video streaming, recording and event management functions that allow users to record video continuously, on schedule, on alarm and/or on motion detection.

iPiS mobile

iPiS mobile is a free application designed specifically for Rinosec security network products, available as both Android and iOS. It enables you to view live video, control pan/tilt/zoom functions, search and playback images from Rinosec network cameras and NVRs, anywhere via your Smartphone.
